Vontier's Driivz Partners With ENAPI to Expand Global EV Roaming and Simplify Connectivity

2025-08-27

Driivz's technology will ensure flexibility for CPOs and eMSPs as they provide seamless EV charging experiences across borders and networks

RALEIGH, N.C.--(BUSINESS WIRE)-- **Driivz**, a **Vontier** (NYSE: VNT) company and leading global software supplier to EV charging operators and service providers, today announced a partnership with **ENAPI**, a Berlin-based roaming connectivity platform, to deliver seamless, scalable EV charging across borders and networks, benefitting charge point operators (CPOs), e-mobility service providers (eMSPs), and EV drivers alike.

This partnership unites the Driivz Smart EV Charging and Energy Management platform with ENAPI's Open Charge Point Interface (OCPI)-based roaming broker, dramatically expanding reach and streamlining transactions between networks. This collaboration will provide Driivz customers with instant access to ENAPI's extensive roaming network, which includes over 350,000 charge points connected via eight of the top 10 eMSPs in Europe. Drivers will be able to use different charging networks across this extensive region with a single payment account.

"We believe that interoperability and flexibility are key to the future of e-mobility. Partnering with ENAPI helps us to deliver both - at scale," said Driivz CEO Andy Bennett. "We share the same vision of bringing seamless charging experiences to drivers, no matter where they're headed."

Accelerating Roaming Network Expansion

This integration of Driivz's platform and ENAPI's roaming broker will advance the expanding EV charging ecosystem towards true global interoperability. It will provide significantly more charging options, broader geographic coverage, and improved driver convenience—making the EV charging experience smooth for drivers, regardless of their location and network. As they look to expand their reach and reduce time to market, CPOs and eMSPs will

enjoy simplified network-to-network integration without the complexity of managing dozens of bilateral connections.

A Shared Vision for Driver-Centric Innovation

Driivz and ENAPI are united by a common goal: making EV charging simpler, more accessible, and more scalable. By minimizing friction produced by cross-network transactions and enabling real-time communication between platforms, EV drivers are receiving the seamless charging experience they've come to expect - no matter where the road takes them.

“Our mission is to make EV charging transactions seamless, efficient, and accessible,” said Jakob Kleihues, co-founder of ENAPI. “Partnering with Driivz allows us to accelerate progress on that mission, empowering both CPOs and eMSPs to deliver better service at greater scale.”

Following this European rollout, Driivz and ENAPI plan to extend this seamless roaming to North America and Asia-Pacific, aligning with emerging ISO 15118 Plug & Charge standards.

Enabling Seamless, Open Connectivity

As an early adopter in OCPI technology, Driivz has led the industry in enabling interoperability to reduce range anxiety and foster a transparent and user-friendly EV charging marketplace. With OCPI support first integrated into the Driivz EV Charging and Energy Management platform in 2015, it currently supports hundreds of OCPI 2.2.1 connections in production.

Today's partnership further extends Driivz's robust roaming ecosystem, which includes trusted partners like Hubject and GIREVE. It reflects a strong commitment to an open, hardware-agnostic, and neutral approach to EV charging infrastructure. Expanding roaming also provides utilities and grid stakeholders with smarter energy planning through improved data transparency and more consistent load behavior across charging networks.

About Driivz

Driivz, a Vontier (NYSE: VNT) company, is a leading global software supplier to EV charging operators and service providers, accelerating the plug-in EV industry's dynamic and continuous transformation. The company's intelligent, cloud-based platform spans EV charging operations, energy management, advanced billing capabilities and driver self-service tools.

Driivz's team of EV experts serves customers in more than 30 countries, including global industry players such as EVgo, Shell, Circle K, Volvo Group, Recharge, St1, ESB, Mer, Francis Energy, Ennet Corporation and eMobility Power. The Driivz platform currently manages over 150,000 public chargers (hundreds of thousands in roaming) and hundreds of millions of events for millions of EV drivers in North America, Europe and APAC. For more information, please visit <https://driivz.com/>.

About Vontier

Vontier (NYSE: VNT) is a global industrial technology company uniting productivity, automation and multi-energy technologies to meet the needs of a rapidly evolving, more connected mobility ecosystem. Leveraging leading market positions, decades of domain expertise and unparalleled portfolio breadth, Vontier enables the way the world moves – delivering smart, safe and sustainable solutions to our customers and the planet. Vontier has a culture of continuous improvement and innovation built upon the foundation of the Vontier Business System and embraced by colleagues worldwide. Additional information about Vontier is available on the Company's website at www.vontier.com.

About ENAPI

Founded in 2024 by Jakob Kleihues and Dennis Laumen, ENAPI is building the clearing house for EV charging, connecting CPOs and eMSPs to improve driver experiences and enable a unified charging network. With scalable solutions, ENAPI is driving the electrification of mobility.
